INSTALLATION INSTRUCTIONS

Please read these instructions completely before proceeding with the installation of your Instant Kennel Floor. You'll find Instant Kennel Floor quick and easy to install. Just follow these simple three-step instructions the first time you install your Instant Kennel Floor and any time you decide to relocate your kennel.

Instant Kennel Floor can be placed on any level, well-drained surface, including gravel, grass, earth, sand, etc. Ensure that water does not pool in the spot where you plan to locate your kennel. If desired, prior to installing your Instant Kennel Floor, you can improve the site by putting down a layer of sand or pea gravel to level out the area and provide additional drainage.

Step 1:

Remove your Instant Kennel Floor from the box, unfold it and lay it flat on the ground. You can install your Instant Kennel Floor with either side facing up. You may find creases where it was folded during shipping; they won't affect the performance of the floor, and will disappear when the floor is stretched out.

Step 2:

Remove the landscape spikes from the hardware package that came with your Instant Kennel Floor. Brass grommets have been factory installed in each corner of your Instant Kennel Floor and at one or more points along each side. Secure one corner of your Instant Kennel Floor to the ground, by inserting a spike through the grommet hole and driving it into the ground. From the opposite corner, pull the Instant Kennel Floor just tight enough so that it lays flat and smooths out any creases. Repeat for the two remaining corners and insert the extra spikes into the remaining grommet holes and drive them home. That's it ... you're done!

Step 3:

Now you're ready to install the kennel. Each Instant Kennel Floor is manufactured slightly larger than the footprint of your kennel. Place your kennel in the center of the Instant Kennel Floor to ensure that the edges of the floor are on the outside of the kennel. Do not drag the kennel across the flooring, as sharp edges can damage your Instant Kennel Floor and void the warranty.

Your installation's complete!

CLEANING

To clean your Instant Kennel Floor, simply hose it off. From time to time apply a disinfectant appropriate for use in kennels and hose off as usual. If you have any questions visit our web site at kennelfloor.com or e-mail us at info@kennelfloor.com and we will be pleased to assist you.

Note: Instant Kennel Floor is a heavy-duty, woven textile and is not designed to meet the standards of clothing grade fabric. As such, your floor may contain some minor inconsistencies in the weave. These will not affect its strength or utility.
